

THE PROCESS PROS ■ your gateway to process improvement

# Government Supply Chain Management Overview Practices

# Government (supply chains)

## Results

- Realized various (supply) chains in social and or safety challenges like domestic violence, juvenile delinquency, prolific offenders, homelessness, drug addiciton, psychiatric acute care

## Goals

- Break the silo's and realize a well managed delivery chain
- Increase the effectivity of the professionals involved
- Get all parties share the same goal

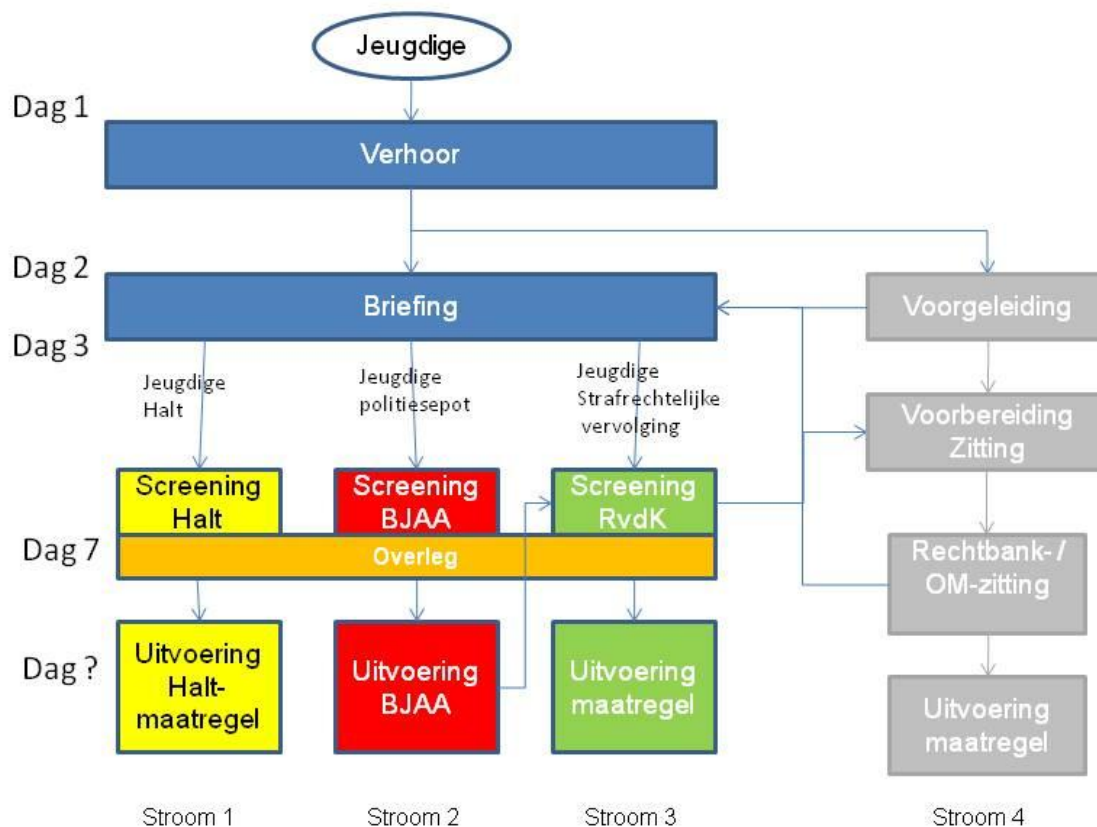

## Working method

- We usually did the project management, but all senior managers were involved
- Logistic thinking was introduced as a strategy and process management as the tool to manage the chain
- Process simulations were a key transformation tool
